Drivers' licenses fee has been raised to \$1 a year. Drivers' licenses at present are issued in perpetuity for fifty cents. It is pointed out that the practice in other provinces is to put them on an annual basis, and Alberta will now follow suit. No date has yet been set for the renewal of drivers' licenses. It was explained that it would be necessary to have the legislation passed by the House for this change, and the date for the first of annual renewals would be considered at that time.

## What About Immigration?

The question of encouraging and permitting immigration to Western Canada is again looming on the horizon after a hiatus of six or seven years in the flow of new settlers to this country from Great Britain and some of the European countries.

With the agricultural and economic depression of the past few years still laying a heavy hand on the peoples of the prairie provinces and with the shadow of half a dozen years of widespread unemployment and direct relief not yet obliterated, colonization schemes, with Western Canada as one of the objectives, are being considered and launched on both sides of the Atlantic.

In the British House of Commons a motion was adopted in late December inviting the House to take prompt steps to survey the possibility of emigration within the Empire and the Under-secretary for Foreign Affairs announced the government's decision to appoint an Empire Settlement Board of eight members and its acceptance of the report of an inter-departmental committee for overseas settlements.

On this side of the ocean, public announcement was recently made of the promotion, presumably by private interests, of a colonization scheme, under which it is proposed to bring out for settlement on purchased land in Saskatchewan, one hundred families of experienced farmers from the County of Derby, England, accompanied by an intimation that this is but the precursor of a number of similar colonies.

Under this scheme, British capital, it was reported, is investing sufficient money to purchase 100 quarter sections of land at \$20 an acre, farm implements, livestock and machinery to the extent of \$12,500 per family. The money is to be of an revolving fund, for, according to press reports, "Each year they (the immigrants) will repay part of what they make from crops. At the end of five years they are supposed to have saved enough to be able to leave the colony and buy farms for themselves. The county authorities in England will make a loan equal to what has been saved so as to enable the purchase of farm and equipment. When they leave, their places will be taken by other British emigrants."

The plan, it is reported, contemplates safeguarding to prevent the migrants becoming a charge on the country during their five year apprenticeship period and their activities are to be supervised.

Without taking cognizance of the possible ultimate fate of a percentage of the beneficiaries under such a project, the effect of colonization of new settlers on the welfare of established farmers, of the agricultural industry in the west and of the country, under this or any other immigration plan, at the present time and under existing conditions, is worthy of serious consideration on the part of the provincial and Dominion authorities, before sanction to such plans is given, or, in fact, to immigration generally.

It must not be forgotten that the immediate future of agriculture in the prairie provinces is somewhat doubtful with export markets for hard spring wheat contracting, with consumption tending to decline in Canada's best wheat market and with, as yet, no new markets opened up.

Thus, the farmers on the land now in the prairie provinces are more than able to take care of the existing market for their major export product and to bring in others to compete with them in this particular product does not appear to be a reasonable act.

There appears to be some hope of expanding markets for some other exportable agricultural products which can be produced on the prairies, principally livestock and livestock products, but, so far, these markets have not been sufficiently developed to warrant increased production by adventurous methods. The trend rather is in the direction of improvement in quality and assurance of regularity of supply. Until this has been achieved and markets for such products broadened because of it, it is reasonable to suppose that farmers already on the land can take care of the demand. As for other agricultural products which must be confined to local markets, everybody knows that the capacity of these markets is so limited at present, and likely to be for some time to come, that their requirements can easily be cared for without bringing in new settlers to increase production.

Until these problems are in a fair way to be solved and farmers already established in the country have had a reasonable opportunity to at least partially rehabilitate themselves and recover some of their lost ground, the wisdom of bringing in new settlers, no matter how desirable the type, is open to serious question.

Certainly the rural sections of the west cannot be expected to welcome new immigrants with open arms, and it is equally certain that the urban centres, who are busily engaged in assisting former farm residents to get back on the land or return to the countries of their origin, will look askance at any proposal to establish more new settlers from overseas.

The oldest varnish still existing in the world is that on Egyptian mummy cases. In some instances the varnish is 2,500 years old.

Maybe Japan is simply determined to save China from herself.

Baseball sees more injuries than does any other sport.

### WHY MOTHERHOOD?

THE period in a woman's life just before her child is born need not be a time of illness and anxiety. At such a time it is essential that good health and good spirits be maintained. The task of Dr. Pare's Favorite Prescription nourishes and strengthens the body of the expectant mother, which, when done, it is also strengthening the child. Also for the mother's health and for women in middle life going through the "change." Pare's Favorite Prescription is the vegetable tonic needed. Buy now! One size, tablet \$5c, liquid \$1.00 & \$1.25.

### Tickets As Gifts

English Railways Had Novel Idea For Holiday Season

A new stunt to encourage railway travel and the traditional pantomimes in London marked the Christmas season in the United Kingdom. In the industrial north and on the Clyde where business has showed marked improvement, it was one of the happiest celebrations in years.

First place among Christmas novelties must be given to the British railways which made arrangements for the sale of tickets in advance which could be sent to passengers. The companies also undertook to enclose a special Christmas greeting card devised to hold the tickets so distributed.

The schemes, for instance, enabled people living in the North of England who desired their friends in the South to visit them for the festive season, to purchase the railway tickets in advance and forward them as Christmas or New Year gifts.

### A Soviet Hollywood

Film Industry To Be Developed In Southern Russia

Hal Rosen, Hollywood cameraman who is filming Shakespeare's "As You Like It," featuring Elizabeth Berger, will explore Russia and the Orient for film prospects on his way round the world and back home.

"The Russian government has invited me to Russia, and I am going through with this picture," Hal said. "Construction of a gigantic 'Soviet Hollywood' is to start early next year."

"I think there may be a great future for Russian films. In the silent days they produced some of the most beautiful I have seen."

"England to-day can produce pictures as good, on an average, as America, but the equipment is bad. For instance, a picture like 'Broadway Melody of 1936' could never be turned out in England."

The new film city in Russia is to be located in the semi-tropical south. More than 9,000 people, according to H. Z. Shumatsky, chief of the Soviet cinema industry, will engage in film production. It will not be ready until the summer of 1937.

### Europe In Arms

Nations Of The Continent Could Muster Millions Of Soldiers

The veteran Austrian military expert, General Alex. Alexin, estimated that the leading nations of the continent of Europe could muster 35,000,000 soldiers for instant service in case of an emergency.

In a statement published in the Vienna weekly "Sunday and Monday Newspaper," General Alexin estimated forces subject to immediate call as follows: Russia, 13,000,000; Italy, 6,500,000; Germany, 6,000,000; France, 5,800,000; Poland, 3,500,000.

He said his country frankly took up rearmament in 1935 as the "only feasible policy for Austria," and that the nation could now muster 500,000 men if a sudden war developed.

### Heroine Of Australia Dead

Earned Name By Rescuing Crew Of Wrecked Ship

The "Grace Darling" of Western Australia, Mrs. Grace Vernon Drake-Brockman, mother of Judge Drake-Brockman and Lady Moulton, of Adelaide, died at the age of 75. She earned her name, when as a young girl she was riding on horseback searching for cattle, she saw the sailing vessel George pinnace foundering in the surf on the coast. She and a native boy who was with her rescued the ship's company by riding their horses into the surf and bringing people ashore. She was later awarded the Royal Humane Medal and a gold watch and chain from the British Government.

### Requested Burial At Sea

In her will Mrs. Elizabeth Millidge Goldie of Kings' Rd., Richmond, England, directed that she should be cremated and that her ashes together with those of "my husband, and also my wedding ring, my gold keeper ring, and my silver wedding ring, shall be placed in the same weighted box as my husband's, taken out in a boat and cast into the sea off the coast of North Berwick."

The biological survey says that the owl is more important than quail because it destroys a much greater number of farm pests, particularly field mice.

### Aged Doctor Learns Braille

Favorite Pastime Will Remain With Him When Sight Fails

Anticipating complete blindness, Dr. John H. Lacy, 80-year-old colorful Arizona pioneer, is learning to read Braille so that when blindness comes he still will be able to enjoy his favorite amusement—reading.

Dr. Lacy, an Army and Indian Service physician for years, and a superior court bailiff for the past 10 years, began study of the Braille system four months ago when he began to have difficulty reading, even with a powerful reading glass. He still is able to walk about the streets alone, however.

The physician went to Arizona in 1888 from Virginia. He then was a physician in the army. He later practiced privately in Arizona towns. He has been retired for 20 years.

As a boy, he learned to talk with his fingers to inmates of a school for the deaf and dumb near his home. Later, while in the army, he became an expert telegrapher.

He took his medical degree at the College of Hampton Sidney in Prince Edward County, Va., where his grandfather was president of the college 100 years ago.

### Business In Vienna

Merchants In Austrian City Are Not Very Progressive

Viennese businessmen aren't the world's most progressive. There's not one halfway decent department store in town. Many stores will sacrifice a considerable sale rather than go to the trouble of delivering. Recently the Chamber of Commerce refused to let a Woolworth open, fearing it would be prejudicial to established firms.

The Hapsburgs are drifting back. Archduke Anton, who married Helena of Roumania; Archduke Eugene; and Archduke Karl, who is the only one to have his name in the phone book. Also in the phone book, however, is another Hapsburg, at present the one most conspicuous in the public eye—one of the city's biggest laundries. "Let Hapsburg do your washing" is a line seen on billboards and in newspapers everywhere.

### Big Radium Shipment

Large Consignment Is Purchased By The Ontario Government

Thirty-five little wooden boxes each containing about \$4,400 worth of radium from Great Bear lake were in Ontario department of health laboratories as delivery was made of the largest single shipment of radium ever produced in Canada. The boxes contained a total of 3,500 milligrams of radium, which will cost the Ontario government approximately \$155,000. The supply will go to the Toronto general hospital to replace 3½ grams which have been rented from a New York firm.

The largest calibre gun used in the U.S. navy is the 16-inch.

### Highway Safety

Plan Is Made To Eliminate Loss Of Life From Motor Accidents

Premier A. A. Dymally, who has jurisdiction over New Brunswick's highways, thinks highway safety might be improved upon traffic offenders when they come to court by showing them motion pictures of wrecked machines and injured people.

A plea to eliminate loss of life on the nation's highways in 1936 went out to Canadians from Hon. C. D. Howe, federal minister of railways, and ministers with jurisdiction over highways of four provinces.

Impressed with the growing toll of highway fatalities, Premier Dymally of New Brunswick; Hon. T. B. McQuesten, highways minister for Ontario; Hon. W. R. Clubb, minister of public works and labor in Manitoba; and Hon. W. A. Fallow, Alberta minister of public works, joined with Mr. Howe in messages urging highway safety.

Recalling the federal government, the railways and municipalities had in the past quarter of century spent a total of \$36,000,000 for protecting level crossings, Mr. Howe said the work must be continued and extended as the public interest required "but as the toll of death and injury in motor accidents continued to mount it becomes increasingly evident that the crux of the problem is not so much the level crossing but along the highways themselves."

### Events Of 1935

Outstanding New Stories Chosen By Canadian Press

Following are the 10 best world newsbreakers and the five best Canadian stories chosen for a Canadian Press survey by the men who handled them for the front page.

World news: (1) Death of Will Rogers and Wiley Post; (2) Italy's invasion of Ethiopia; (3) Hauptmann's trial for the Lindbergh kidnap-murder; (4) assassination of Huey Long; (5) Queen Astrid of the Belgians' death; (6) the king's jubilee; (7) application of sanctions against Italy; (8) British election; (9) Germany's re-armament; (10) scrapping of the N.R.A.

Canadian News: (1) Dominion election; (2) Social Credit victory in Alberta; (3) Regina riots; (4) Canada-U.S. trade pact; (5) the Ontario government's dispute with Quebec power companies.

### Romance Starts Panic

Flowers have caused a panic in the native quarter of Cairo. An aeroplane, flying very low, began dropping mysterious packets—which the natives took to be bombs. They rushed for safety—but the "bombs" were merely bouquets dropped by an air-minded suitor before his fiancée's house.

Baikal is the largest lake in Asia, having an area of 13,500 square miles.

### MORE CONVENIENT TO USE . . .

Just hang a package in your kitchen. You'll be delighted with its convenience . . . for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

# Scientists Say This Year Will Bring More Sunspots And Trouble May Result

Crops should be smaller, people more irritable and radio reception worse in 1936 than in 1935 if scientists have plotted correctly the number of spots due to pock the surface of the sun next year.

With long-range telescopes, astronomers have studied sunspots for several centuries and year by year they become more convinced of their domineering influence on every form of life on earth. One of the chief centres of study is the Dominion observatory at Ottawa.

The year 1936 will find sunspots increasing in number. This should produce more rain in the Maritimes and along the Pacific coast in British Columbia but less in Ontario, the prairies and inland Quebec. There should be lower temperatures throughout the country, more cloudy days, fewer thunderstorms, more northern lights, more electrical disturbances to radio waves.

When sunspots are on the increase, the health of man and animals falls off. If western wheat farmers are to have less rainfall in 1936 and consequently a smaller crop, they can draw satisfaction from the prediction there will be less grasshoppers than in 1935. If the year runs true to form, there will be less rabbits, grouse, partridges and other game.

The influence of sunspots on health has not been plotted with any degree of accuracy but scientists are convinced there is a connection between them. The years 1917 and 1918, the world-wide influenza plagues, saw sunspots reach the highest number since the turn of the century. Scientists believe the same electrical disturbance that throws your radio out of gear, also causes your nerves to go jittery, making you irritable.

Sunspots are really storm centres, whirling around in the hot, solar gases. Surrounding them are large areas of bright clouds, rich emitters of ultra-violet light. Scientists believe the link between sunspots and meteorological conditions on the earth lies in the waxing and waning of the ultra-violet rays from the sun. It has been determined lately the sun emits more ultra-violet light when sunspots are numerous than when they are scarce.

## Protecting The Buffalo

Indians Engaged To Restore Herds To U.S. West

Another step toward restoring a semblance of the once-mighty bison herds that ranged the mountains and prairies of southern Montana, 100 of these animals, shipped from Yellowstone National park, have been turned out in the Crow Indian reservation, south of Billings, Mont.

The buffalo, held in huge crates, were hauled in trucks from Lamar, in the park, to the vicinity of the Big Horn canon, where they were released. The first shipment consisted of 28 bison, taken from the park herd during a round-up of about half of the 3,000 animals ranging in the national playground.

Last year 113 bison were similarly removed to the Crow country under a plan worked out by Robert Yellowstone, superintendent of the reservation, who was chosen for the office by the Indians from among the leaders of the tribe. Natural increase has brought this number to 150.

"We have just completed a fence made completely of logs, which encloses a land-locked area, faced on three sides by precipitous rock walls, enclosing an area which will support about 1,000 head winter and summer," Yellowstone explained.

"The buffalo will use the deep canons which heretofore have been wasted feed. Whenever the herd overflows this area, we have another land-locked range we can put them into. I am sure that the Indians demonstrated to the country at large that we are safe and proper persons to entrust the protection of wild life to, including buffalo, elk and other animals."

Hippopotamuses can stay under water only about five minutes.

Trouble with these educated chaps is they all want to start at the top.

## Cod Liver Oil Paint

Fishermen All Help When Church Is Short Of Finances

A fishermen's church for generations, St. James United Church, Sambro, N.S., has the nautical touch down to walls painted with cod liver oil as it celebrates its 125th anniversary in this community of fishermen.

Founded in 1810, it has served first the Methodists and then in the United Church of Canada. Preachers and congregations have come and gone, but the tiny church has stood.

Though the going was sometimes hard in that century and a quarter, it struck no serious snag until last year. Then, with the church half covered, the paint gave out. There was no money, and it looked as though the building were to remain mottled until fumes were raised.

But the fishermen were not stampeded. Some found some red ochre. Others turned over cod liver oil they were saving for market. Mixed, the two were just the thing. And the painting went on.

Now, the church spire points into the sky from Graveyard Point proudly as ever, beacon for the fishermen as they come in from the Atlantic. Inside, Rev. P. W. Mitchell, student minister from Klat Island, Nfld., conducts services and supervises the night school classes that are held twice a week.

Grateful for the lessons, the fishermen are getting up a new scheme to free the church of financial worries when painting time rolls around again. They plan to donate one of their lobster pots apiece to the church, and to give it all revenue from that pot.

## Bible Is Valuable Relic

A 14th Century Edition Contains Many Typographical Errors

A typographical error, one of many in a 14th century edition of the Bible, is the reason why that edition has been called the "Vinegar Bible." It was revealed on the 400th anniversary of the first English printing of the Book of Books.

Chapter XX, St. Luke, bears the heading "the parable of the Vinegar" instead of "the parable of the Vineyard." Numerous other misprints were made throughout the edition.

A copy of that particular Bible, one of the few in this state, was presented by "His Gracious Majesty King George II." to the Old North Church (Christ church). It is the object of intense interest of eighteenth as it recycles, preserved for posterity, in a glass-enclosed stand in front of the church.

The printing was the work in 1717 by John Baskett and was later styled "a basketful of errors."

However, the edition surpasses every previous one for beauty in engravings and initials.

## Year Of Good Will

Japanese Welcomed 1936 As Year Of The Mouse

Japanese all over the world celebrated the end of the year of the boar—a year of fierce aggressiveness, and greeted the year of the mouse—a year of kindness and good will.

Each year in a 12-year cycle is named for a different animal. Thus, 1936, the year of the mouse, will be followed by years of the cow, tiger, rabbit dragon snake, horse, sheep, monkey bird, dog and then boar.

A new year means to the Japanese the start of a new life. All business except the most necessary was suspended entirely for two weeks, during which Japanese called on their friends every day to share the second otoso a sweet salt (rice wine), dedicated to the most important of Japanese holidays.

## Not Readily Appreciated

Even after tomatoes were proved safe for eating—and not poison as had been supposed—they were not appreciated for some time as valuable protective food, but were used merely to add color and flavor to a meal.

## Use Of Honey In Cooking

May Be Used To Replace Sugar In Practically All Recipes

Before the introduction of cane sugar, honey was apparently the only sweet available for human use in most civilized countries and as such was eagerly sought for and very highly prized. At the present time, however, the per capita consumption of sugar is approximately 50 times greater than that of honey. This difference is rather surprising when one considers the comparative food value of the two products, to say nothing of the fact that sugar is being imported, while honey is being exported. Sugar, of course, is largely used in the manufacture of other food products and for sweetening purposes, while honey is most commonly used as a spread to replace jams, jellies, marmalades or syrups. It is rather unfortunate that few housewives realize the fact that honey may be used in whole or in part to replace the sugar required in practically all recipes, and that when it is so used certain qualities are imparted to the final product that sugar cannot give.

In experimental work on the uses of honey in cooking, done by the Central Experimental Farm, Ottawa, it was found that cakes, cookies, etc., made with honey remained fresh and moist for a much longer period than when sugar was used, and, where mild flavoured honeys were used to replace the sugar, the flavour of the finished product was much improved. When honey is used to replace sugar in any recipe, it must be remembered that approximately one-fifth of the honey is water, therefore the liquid portion of the recipe must be reduced by one-fifth. Another point to bear in mind is that the sweetening power of honey is at least equal to that of an equal quantity of sugar. This is important when replacing sugar with honey in the making of soft drinks, ice cream, candies or like products.

Honey can also be successfully used in the making of marmalades and jellies, and also in the canning and preserving of fruits. Those interested in the use of honey in the home should apply to the Publicity and Extension Branch, Department of Agriculture, Ottawa, for a copy of Pamphlet No. 161 N.S., entitled "Honey and Some of The Ways It May Be Used."

## Whole Town Worked

"We must have a swimming pool," declared the people of Lippings, a health resort in Western Germany. "Right," agreed the burgomaster. "There's no money—so we'll dig it ourselves." The entire population queued up for picks and shovels and set to work. And now Lippings has its swimming pool.

"Oh, Bobbie! Just look at what the puppy has done to this room!" "Isn't it wonderful, mamma! In less than five minutes!"

## Pillows That "Put On The Dog"

PATTERN 5508

"Putting on the dog" is now the favorite pastime in applique, since someone started this new and amusing fad for canine pillows. Both seamy and terrier require but one big patch of applique apiece, and then the fun begins! Applique with single stitch, you'll be surprised how soft and furry an effect you can create in the way of outlines, spots and shading. It's easy to do, too.

In pattern 5508 you will find a transfer pattern of a dog 11 x 15 1/2 inches and one 8 x 10 1/2 inches. Material requirements, color suggestions, illustrations of all stitches needed.

Obtain this pattern and 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 476 McDermott Ave. E., Winnipeg.

There is an Alice Brooks pattern book published

# Must Wage Ruthless War Between Humanity And Insects, Says Entomologist

## Lightning Rods Give Protection

Electrical Wizard Says Closing Windows During Storm Safe Thing To Do

It may be old-fashioned to believe in lightning rods and shut your windows when a thunderstorm threatens, but it is a safe thing to do, according to Karl B. McEachron, who directs research into lightning in a laboratory at Pittsfield, Mass.

McEachron, while visiting Portland, explained that lightning follows the line of least resistance so readily that a well grounded lightning rod is about the most efficient simple protection obtainable. A good rod is 95 per cent. efficient, five per cent. being discounted due to the fact that lightning does not always strike the highest point.

The electrical wizard explained that the ancient theory of closing windows to keep lightning from being blown in, advocated sternly by our grandmothers, has proved to have some scientific backing.

Pictures taken of discharges show that when a wind of 45-miles-an-hour velocity is blowing, the lightning is blown to one side about 60 feet.

The great damage from lightning is done by the tremendous speed of discharge, which builds up terrific pressures, McEachron explained. Voltages from 200,000,000 volts upward with amperages that reach a limit of 200,000 amperes have been measured. When such a charge strikes, it literally blows things to pieces.

## Fate Of Old Windmill

Built 137 Years Ago Will Likely Be Demolished

Built in 1799, and believed to be the only complete example of its kind near London, the windmill at Upminster is for sale and possible demolition. Mr. Abraham, the last of the millers to work this ancient windmill, still climbs the tower steps into the loft, a journey he estimates he has made daily 30 times for 63 years. Should the mill—which now has bricks around it instead of crops—be pulled down, Mr. Abraham will suffer a heavy blow, for it has been worked by members of his family for many years, his father having taken over from his grandfather.—London Daily Sketch.

## Western Wool Clip

The quality of the 1935 Canadian western wool clip is reported as being particularly good, and consignments for shipment to Great Britain via the Panama canal are slightly larger than a year ago.

A great war, a world-wide, ruthless, persistent menace to humanity between human beings and insects, is going on.

"Insects are as a group the most dangerous of all animals." They are, in fact, man's chief competitors for the supremacy of the earth," according to Arthur Gibson, Dominion entomologist, head of the entomological division, department of agriculture.

This division constitutes in Canada the spearhead of federal attack on insects which live by destroying grains, fruits, vegetables, forest trees and even domestic animals absolutely essential to human life. These insects are "direct and relentless competitors for nearly every one of the necessities of life."

The insect menace is greater today than in any period of past history, according to authorities in Ottawa. For the growth of the menace in Canada, Canadian people are themselves partially to blame. Forests have been cut and destroyed. Consequently the birds and other animals which prey upon insects have decreased in number. Similar crops have been grown over large areas year after year enabling insects which formerly fed upon native vegetation to change their habits and wax fat upon new food plants.

Annual devastation in Canada alone from insect pests is considerably over \$100,000,000, according to the entomological division. Some years it is far above this. Every now and then insects stage a spectacular attack on humanity which serves to bring the menace to attention in a dramatic manner. Grasshoppers, for instance, sweep over western Canadian grain fields leaving them in ruins. The codling moth takes toll of Ontario orchards to the extent of \$2,000,000 a year. At present the spruce sawfly is causing considerable damage to the wonderful evergreens of Gaspe and sweeping on toward forests of Quebec and Ontario.

These are just a very few specimens. Federal and provincial government officials are thoroughly alive to the danger. With such resources as are available, they go on fighting an army of numberless enemies which breed with tremendous rapidity. It is estimated at least 70,000,000 bushels of the 1934 Canadian wheat crop were saved when provincial and federal authorities co-operated to meet the grasshopper plague. By the end of 1934, the grasshoppers were dwindling.

But the menace is everywhere. More than 600,000 different kinds of insects have been studied and classified. Probably as many more distinct species await classification. They hold by far the predominating position in the animal kingdom.

## Consider The Horse

Motor Drivers Should Never Get In Front Of Moving Load

The Boston Traveler, out of the kindly heart of its editor, gave its readers the following last month in display type:

Those of us who drive automobiles should never cut in front of a moving horse.

The horse's big job is getting his load started. Once inertia is overcome, the horse (on level ground) has merely to keep a bit of a strain on the pull.

When we force a horse to stop, we throw the weight of the load against him. This is tough on the horse. Then he has to get that load into motion again. All this effort in addition to the fright we probably give him.

It is easy for us to stop and start our cars. Let's do it.

When Noah called the ocean blue, he had his troubles same as you. He drove and drove and drove his ark Until he found a place to park.

The cooking banana is similar in appearance to the ordinary eating banana, but usually is larger and has a more pronounced stem.

## HOW TO AVOID ILLNESS

When you begin to feel fagged out at the end of the day, look out. Illness is just around the corner waiting to lay you low. At times like this there's nothing like Wincaris for great tonic that has won over 20,000 recommendations from medical men.

Wincaris is a delicious wine, not a drug. In each bottle there are all the nourishing elements of 245 lbs. of grapes added to the strengthening elements of beef and guaranteed malt extracts.

These elements in Wincaris will quickly restore lost energy. They will help you to sound sleep, vigorous awakenings and active, enjoyable days. Drink this delicious wine regularly three times each day, and soon you will drop from your shoulders.

To pick you up when you are out of sorts, to soothe your nerves, enrich your blood, or in cases of nervousness, insomnia, anaemia and debility, take Wincaris. At all drug stores—Sole Agents: Harold F. Ritchie & Co. Ltd., Toronto.

## WORLD HAPPENINGS BRIEFLY TOLD

Orders for at least half-a-million bicycles were placed at the bicycle and motorcycle show at Olympia, and 30,000 motorcycles also were sold.

The new speaker of the Alberta legislature will be N. E. Tupper, M.L.A. for Cardston. It was learned at Edmonton on high authority.

The New York Times and the Chicago Tribune, banned from Italy since last June, are again allowed to enter the country.

Lady Tweedsmuir, wife of the Governor-General, has accepted honorary membership in the Canadian Women's Press Club.

Dr. Walter A. Riddell, Canadian delegate, was elected honorary president of the Pan-American conference of the International labor office of Geneva, held at Santiago, Chile.

The Royal Air Force is experimenting at its plant in Farnborough, Eng., with a view to evolving a silent airplane—not merely soundless in the cabin, but inaudible from the ground.

The entire library of the late Canon A. P. Shaford of Montreal, including 1,750 volumes, has been presented to University of King's College, Halifax, by Mrs. Shaford.

Prince Albert ratepayers paid \$20,000 more in current taxes last year than in 1934. Mayor H. J. Frazer announced. Tax rates were virtually the same for the two years.

Queen Giovanna of Bulgaria sent a contribution of 13 ounces of silver to the Italian war fund through the legation at Rome. The queen is a daughter of King Victor Emmanuel.

When British Columbia lumberjacks returned to their various logging camps after the Christmas shutdown, they found pay increases ranging from \$7.50 to \$15.50 a month. Several thousand men are affected.

### Largest Radium Deposit

South America Now Thought To Hold World's Greatest Quantity

Dr. Otto Vogt Von Sickingen, Haverford, Pa., bacteriologist, has discovered what he believes to be the largest radium deposit in the world along the Corentyn river in South America.

On his arrival in Boston, he declined to disclose the exact location of the deposit until terms are agreed upon with the government in whose territory it is located. The Corentyn river borders Dutch and British Guiana.

Dr. Von Sickingen also said he had discovered a possible cure for infantile paralysis in a drug prepared by boiling the skin of a South American reptile.

A common waterfowl, the North American grebe, eats its own feathers.

## PRINTING PRESSES FOR SALE

One Pony Optimum Cylinder Press, one 10 x 15 and one 12 x 18 Chandler & Price Gordon Press. Also 24-inch Guillotine Paper Cutter and one Linotype machine. All in excellent condition. Apply Box 526, Regina, Sask.

### Historic Scene Reconstructed

Royal Bank Calendar Depicts Opening Of Canada's First Railroad

Was Canada's first railroad opened in 1836 or 1837? Were the cars hauled by a locomotive or by horses on the inaugural run? How big was the locomotive and did it break down or not?

Those and many similar questions which have centred around the opening of Canada's first railroad a century ago find their answer in a new calendar just issued by The Royal Bank of Canada. Executed by Sherif Scott, one of Canada's foremost painters of historic subjects, this year's calendar picture depicts the colourful scene at Laprairie when the first train of the Champlain & St. Lawrence Railroad steamed out on its inaugural run.

On many important aspects of this opening ceremony, on the character of the locomotive itself and even on the events which transpired, historians differ. Indeed, some doubt has hitherto existed as to the exact date of the opening of this short fifteen mile line between Laprairie, Que., and St. Johns near the head of Lake Champlain.

Faced with these difficulties and in order to ensure the accuracy of this year's painting, The Royal Bank went to original sources. For the actual dimensions and structural details of the "Dorchester" which hauled the first train, the artist used the actual working drawings supplied by the firm of Robert Stephenson & Company of Great Britain, from which the "Dorchester" came early in 1836. For reliable information on the events of the day, reference was made to the following files of the Montreal "Courier" and "Gazette" for July 23, 1836, which carried complete eyewitness accounts.

These accounts demonstrated clearly that the actual opening ceremony took place on Thursday, July 21, 1836, and that the locomotive "Dorchester," contrary to the generally held belief, did actually haul the train on that occasion. They also revealed that prominent amongst those present were the Governor-General, the Earl of Gosford, Sir George Clippes, veteran of the Peninsula War and Sir Charles Grey, formerly a supreme judge of the Court of Madras. These three had come to Canada in 1835 as a commission to enquire into the grievances that were agitating the colony and which were soon to culminate in open rebellion. Peter McGill, chairman of the railway company, and later mayor of Montreal was also present.

The story, as it appeared in the "Gazette" of a hundred years ago, is reproduced in essence on the calendar pad. The relative dimensions of the "Dorchester" and a locomotive of the present day are also provided and strikingly demonstrate the pygmy size of Canada's first passenger locomotive. Somewhat larger than a baby Austin, yet smaller than a Ford, a grown man could easily see over the boiler of the "Dorchester." She was only 13' 18" long as compared with the 90 foot giants commonly used to-day by both Canadian railways. And yet, for all her diminutive size, she performed heroic service and over a fifteen week period in her first year of operation, she travelled 8,600 miles and hauled 15,924 passengers besides freight.

Additional interest is given to this year's calendar picture by the fact that plans are now going forward for a centenary celebration next July.

### SELECTED RECIPES

#### BASIC SPONGE RECIPES

A large variety of attractive breads, rolls, coffee-cakes etc., can be prepared by using one general sponge recipe which being the "base" or start of the operation, is termed "Basic Sponge".

With this "Basic Sponge" the housewife is able to produce very simply and easily a variety of attractive breads and cakes. In fact, there is no end to the possibilities opened up by this "Basic" recipe.

1 cake of Royal Yeast  
1 cup of lukewarm water  
1 cup of milk  
1 tablespoon sugar  
4 cups of sifted bread flour

Soak the yeast cake for 15 minutes in the lukewarm water.

Dissolve the sugar in the milk and add same to the dissolved yeast cake. Add the flour and beat thoroughly into a batter. Cover and let rise in a warm place, free from draughts overnight or until doubled in bulk.

If this batter is started at 9 to 10 p.m. it will be ready to use 7 or 8 o'clock the following morning.

It is advisable to add 1 teaspoonful of salt to the above sponge in warm weather as this helps to prevent excessive fermentation.

Happiness doesn't just happen. It is a reward.

### Has Become Linguist

Toronto Newsday Picks Up Smattering Of Six Languages

This business of riding up and down the country's railroads, peddling food and peanuts, has developed Harry Hill, Toronto veteran newspaperman, into somewhat of a linguist.

Hill, who at present travels on the Canadian National Railway train between Windsor and Toronto, has picked up a smattering of six different languages, not including English. During his 28 years of railroad riding.

The genial, white-haired Hill can peddle his wares in French, Russian, Ukrainian, Polish, Chinese and Iroquois. Endowed with a wonderful memory he memorizes whole sentences after hearing them once or twice.

He has travelled all through the Maritimes and as far west as Winnipeg and it was during the hey-day of immigration when the peoples of many nations were flocking into this country that he first acquired a flair for languages.

"I found these different races were delighted and pleased that somebody could understand and converse with them in their own tongue," reminisced Hill.

Hill got his first taste of railroad riding when he became a "red-cap." To-day, if he had the means to retire he says he would enroll at some school of languages and improve his knowledge of those tongues he already knows.

### A Matter Of Economy

Italians Close Famous Swimming Pool In Order To Save

The new municipal indoor swimming pool at Milan, reputed to be one of the three finest in the world has been ordered closed during the present national crisis in order to effect economies in light, power and heating.

The swimming pool was opened in October, 1934, and occupies an entire building newly erected on the site of the old railroad station torn down four years ago.

It has an electrically operated sectional sliding roof of translucent glass, a visitors' gallery of concrete similar to a grandstand which surrounds the pool itself, and 1,000 small individual dressing rooms.

It was an electrically operated aquatic fans could disport there winter and summer because an elaborate heating system kept the water at a pleasantly cool temperature the year round.

### No Safe Gas Mask

G. Lloyd, under-secretary of the home office, told a questioner in the British House of Commons there is no gas mask which will give the wearer complete protection against any probable concentration of every known poisonous gas.

London's worst day for fatal street accidents is Saturday.

## Crocheting Tomorrow's Heirloom

PATTERN 5254

What more conducive to "forty winks" than this fluffy, lacy afghan! Its crocheted warmth will ward off the most treacherous draughts, its color brightens and gladdens any room it adorns. A very simple pattern to follow. The stripes look like tiny daisies strung together, and are in a crochet stitch which busy hands and needle soon learn to do by heart. Lovely in three shades of one color, it is also effective with each stripe a different color.

In pattern 5254 you will find directions for making the afghan; an illustration of it and of the stitches used; material requirements, and color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## SUNDAY SCHOOL LESSON

JANUARY 19

JESUS PREPARES FOR HIS WORK

Golden text: Thou shalt worship the Lord thy God, and him only shalt thou serve. Luke 4:8.  
Lesson: Luke 3:1-4:15.  
Devotional reading: Hebrews 2:10-18.

### Explanations And Comments

The Baptism of Jesus, Luke 3:21, 22. While crowds were being baptized by John, Jesus came and was baptized also. See the account in Matthew. "In his baptism Jesus was ending his quiet years of preparation at Nazareth and was about to enter the ministry of sacrifice which was to be performed in obedience to the will of his Father. It is for this reason that Luke, with the art of an skilled historian, first completed the story of John, the great forerunner, before mentioning that which in reality was the supreme incident in the career of John—his baptism of Jesus. That incident introduced Jesus to his public ministry and that ministry was to form the very substance of the Gospel.

"Luke does not describe the baptism. He merely mentions it and designates the time when Jesus saw the descending Spirit and heard the voice from heaven. We are not suppose that Jesus before had lacked the presence of the Holy Spirit, nor that he now assumed any new relation to his Father, but as in baptism he had yielded himself to his appointed service, so now he was empowered for his task; as in humility he had identified himself with the sons of men, so now he was assured that he was the Son of God; as he had shown his sympathy with penitent sinners, he now was declared to be the sinless One in whom God was well pleased." (C. R. Erdman).

### Tennyson's Home For Rent

House At Farringford Always Associated With His Works

Tennyson's home at Freshwater, in the Isle of Wight, is for rent. It has long been a shrine to which many journey.

At Farringford, the name of the place, just off the main road from Freshwater to Alum Bay, sheltered by fine old trees which the poet loved and immortalized in his verse, he did much of his best work. Its name is irrevocably associated with his, for it was during the last 40 years of his life—his period of residence there—that he acquired his prestige. The poet's connection with Farringford dates from November, 1833, when he rented it. Three years afterward he bought the house and estate outright.

### Court Bible Stolen

Somebody stole the Bible from the police court clerk's desk at Peterborough, Ont., and court had to be adjourned until a substitute Bible could be borrowed from the city clerk. Witnesses were sworn in with the aid of the city clerk's Bible and the business of the court was continued.

A milk coat is made of 60 or more skins.

## If You Eat Starches Meats, Sweets Read This

They're All Necessary Foods—But All Acid-Forming. Hence Most of Us Have "Acid Stomach" At Times. Easy Now to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion—brought about by too many acid-forming foods in our modern diet. And that there is now a way to relieve this . . . often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Try this just once! Take either the familiar liquid "PHILLIPS' Milk of Magnesia" or the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS'".

### Also in Tablet Form

Phillips' Milk of Magnesia Tablets are now on hand at all drug stores everywhere. Each tiny tablet is a powerful laxative. (See the picture of a box of Phillips' Milk of Magnesia.)

## PHILLIPS' Milk of Magnesia

MADE IN CANADA

### A Star Attraction

Diome Quintuplets Bring Money To Ontario Government

The Diome quintuplets, who brought money to many during 1935, did grandly by the Ontario government, the province's hotel keepers, store owners, service station proprietors and almost everybody who said anything on the roads that led to their birthplace.

Over a four-month period, from June to September, 95,076 automobiles rolled their way around Dufresne hospital and some 380,304 persons stepped out for a glance at the world's most famous babies.

In June, an average of 570 cars a day stopped at the quintuplet home. The number crept to 710 a day in July and burst to a high of 1,486 a day during August. As summer left, so did the visitors, and only 329 cars a day were seen during September.

Those figures, compiled by the Ontario tourist bureau, dropped at least \$74,307 into the coffers of the Ontario department of highways in the four months, and almost \$1,000,000 into the pockets of the province's business men and women.

Estimates pegged the number of United States visitors as 95 per cent. of the total. With the nearest entrance into Canada some 300 miles from this northern Ontario village, the automobile would need at least 15 gallons of gasoline on a two-day trip. More like it took 25.

That meant 1,238,450 gallons from the pumps on the way to Callander. For every gallon, the highway department took six cents, a total of \$74,307 from those below the border alone. You could add \$25,000 from Canadian visitors and total almost \$100,000 in just four months.

Basing the total number of visitors on four to a car, it left some \$805,760 for various people such as the hotelkeeper and restaurant proprietor. It's an overnight stop from almost anywhere to Callander and back, and if your expenses run under \$2.50 a person, you're thrifty.

### Searching For Temple

Expedition Also Seeking Further Information On An Ancient Civilization

Efforts to trace remains of Cleopatra's Temple, which the Egyptian queen built in honor of the birth of her son, will be made by a British expedition.

Oliver Myers, leader of the Sir Robert Mond expedition of the Egypt Exploration Society, also hopes to get further information about an ancient civilization at Armanth, which, it is believed, was connected with that of the peoples of the South Sahara, as far west as Timbuctoo.

Mushrooms contain vitamin D, a German physiologist has discovered.

## BRITISH AND FRENCH FLEETS TO GIBRALTAR AREA

London.—Great Britain and France moved to increase their naval strengths in and near the Mediterranean sea.

Manoeuvres arranged by the naval staffs of the two countries will result in a powerful concentration of fighting ships in that area when the League of Nations council meets again on Jan. 20. At that meeting a proposed oil embargo against Italy will be one of the matters under consideration.

The battleships Nelson and Rodney, the aircraft carrier Arcturion, and the cruiser Calio, along with the 21st destroyer flotilla, will leave home ports for a "spring cruise" starting about the middle of January. It will not take them into the Mediterranean but they will cruise in the Atlantic not far from Gibraltar.

Meanwhile the French first and second squadrons, with a total of 92 warships, ranging from battleships to submarines, will be engaged in manoeuvres in the western Mediterranean, and the French Atlantic fleet will be at or near Casablanca, 200 miles southwest of Gibraltar.

Four British home fleet units now at Gibraltar will be returned to the United Kingdom, the admiralty announced. They are the battle cruiser Hood, the battleship Hamill, and the cruisers Orion and Neptune.

These manoeuvres revived speculation in London diplomatic quarters that oil sanctions might be imposed and that the powers were preparing for eventualities in case of an act of aggression on the part of Premier Mussolini (France and Great Britain already have reached agreement on plans for mutual aid if such an event arises out of sanctions application.)

In official British quarters it was declared that the manoeuvres by the two fleets were not jointly prearranged and that the British home fleet movements had no political significance.

A feeling grew in diplomatic circles that some of the nations, headed perhaps by Sweden, will go to Geneva demanding that oil sanctions be invoked. (Sweden is aroused over the bombing of a Swedish Red Cross unit in Ethiopia by Italian planes.)

## To Probe Mine Disaster

Alberta Government Will Conduct Inquiry Into Coalbush Accident

Edmonton.—A judicial inquiry into the Coalbush mining disaster will be held by Mr. Justice Lunney of the appellate division of Alberta Supreme Court. This decision was reached at a meeting of the executive council and announced by Premier Aberhart.

It is the intention of the government to have the inquiry get under way as soon as arrangements can be made by Mr. Justice Lunney. The government will be represented at the inquiry, the premier stated, by one of the solicitors of the attorney-general's department.

## No Corporation Tax

Ontario Government Will Impose No Levy On Corporations

Toronto.—The new Ontario income tax will impose no levy on corporation income as does the federal tax, it was reported at Queen's Park.

Although the Ontario legislation follows closely the Dominion statute there will be no provisions similar to the federal tax on the income of corporations, the report said. Ontario already has a corporation tax.

About 100,000 persons will be liable to pay income tax under the proposed legislation and from these it is expected a total of about \$12,000,000 will be realized.

## Back Mine Development

Edmonton.—Establishment of an Edmonton Chamber of Mines as an independent entity to promote, develop and protect mining activities, in the rich northern fields became a reality when 75 men interested in the project enthusiastically supported the move in an organization meeting.

## Level Crossings

Large Sum Is Set Aside To Eliminate Danger Spots Across Canada

Ottawa.—Waging war on railway level crossings which have been taking an increasing annual toll of human lives, a total of \$1,400,000 approximately was committed in 1935 for remedial works across Canada, it was estimated. The sum represents an increase of about \$500,000 over 1934 commitments.

Twenty-five per cent. of the \$1,400,000 has been actually expended. The balance will be spent in 1936 as work on the authorized projects is carried out.

Of the estimated \$1,400,000 probably \$1,100,000 has been earmarked out of Dominion treasury funds. The Canadian Pacific Railway, Canadian National Railways and the municipalities have undertaken to put up the difference.

Showing amounts of Dominion commitments, ranging from 40 to 100 per cent. of the total cost in different instances. Major works in the west authorized by the governor-in-council in the last five months alone included:

Near Scottsguard, Sask., on C.P.R., \$24,750.

Cepee, Sask., on C.N.R., \$21,000.

Near Kinley, Sask., on C.N.R., \$15,400.

West of Maunsell, Alta., on Crow's Nest subdivision of C.P.R., \$14,000.

One mile west of Landbreck, Alta., on Crow's Nest subdivision of C.P.R., \$10,500.

## Area Recaptured

Ethiopians Claim To Have Recovered Area Taken by Italians

Addis Ababa.—Ethiopia officially claimed recapture of the whole mountainous Tembien sector west of Makale on the northern front. The assertion indicated the northern counter-offensive, directed by War Minister Ras Muligeta, was a step nearer its avowed goal of driving the Italian invaders back into their own colony.

At the same time the extreme southwestern front reported one of Ras Desta Dement's three columns operating near Dolo had won a victory over natives in General Dodo Graziani's army.

The "little rains," which have rendered the enemy's tanks and trucks useless, contributed materially to both Ethiopian successes, officials declared.

## Predicts Russo-Japanese War

Also Sees Possibility Of Japanese-American Conflict

London.—Former British foreign adviser to the British government in China, expressed the opinion that a Russo-Japanese war was "inevitable." "It may be said that a war between Russia and Japan is inevitable," he said the Royal United Service Institution.

"It is conceivable, although I do not believe it probable, that there may be war between United States and Japan," he added, "but the circumstances which might promote a Japanese-American war would bring us in."

## Prison Farm Quarantined

Outbreak Of Scarlet Fever In B.C. Institution

Vancouver.—Okanalla prison farm has been quarantined to visitors and seven male prisoners isolated following an outbreak of scarlet fever in the Burnaby institution, prison officials said here.

Five of those isolated are definitely known to be affected while the other two showed symptoms. Officials termed the outbreak "very mild" but said every precaution was being taken.

There are 460 men and women at the prison farm.

## The Peace Spirit

Toronto.—Lieut.-Col. George A. Drew, former Ontario securities commissioner, addressing the Electric Club, said he "would like to see a rebirth of the British spirit that was alive in this country in 1914, not for war, but for peace." Mass demonstrations of faith on the part of Canada's young manhood, to be held yearly, were suggested by the speaker.

## PASSES

Mr. Samuel Ryder, famous sportsman and head of the great firm of seed merchants in St. Albans, England, who died suddenly at his English residence. Mr. Ryder presented the Ryder Cup for international competition between British and United States Professional Golf stars, which is one of the highlights of the sporting calendar.

## Aviator Honored

Presentation To "Punch" Dickens At Edmonton Banquet

Edmonton.—Tangible recognition of his pioneering work in development of northern aviation was made to C. H. "Punch" Dickens, newly appointed superintendent of northern aviation for Canadian Airways, Limited, at a banquet here by President J. W. Glenwright, of the Edmonton Chamber of Commerce.

Mr. Glenwright, on behalf of the chamber members, presented a travelling case to the noted aviator who is leaving to reside in Winnipeg. "We have flyers here superior to any in the world and that's not taking in too much territory either," boasted Mr. Glenwright in making the presentation.

## To Study Farming

British Farmers To Tour Australia And Canada

London.—Twenty-six British farmers will leave here on a round-the-world tour during which they will study farm methods in Australia, New Zealand and Canada.

They will go directly to Sydney, where they will be joined by 21 South American farmers and a large group from Australia. After a month in Australia and New Zealand they will go to Canada, travelling across the entire Dominion.

The tour has been arranged by the British National Union and the Overseas League.

## Short Of Objective

Plans For Canadian Women's Memorial Building Have Been Abandoned

Ottawa.—Due to existing economic circumstances the erection of the Canadian women's memorial building in Ottawa has been abandoned, it was announced by Alastair Macdonald, solicitor for the Canadian Women's Memorial Building Federation. Funds contributed for that purpose will be distributed according to the direction of the courts, he said.

The purpose of collection of funds throughout Canada when the federation was formed in November, 1928, was to erect a building to commemorate suitably the services rendered by Canadian women to humanity from pioneer days to the present time.

Mr. Macdonald said approximately \$25,000 had been contributed towards the building fund, \$10,000 short of the objective.

## Motor Regulations

Drivers' License Fee Of One Dollar Per Year In Alberta

Edmonton.—Premier Aberhart announced that 1936 motor licenses would be good for 15 months, but a drivers' license fee of \$1 per year would be required. At present drivers' licenses cost 50 cents and lasted in perpetuity. At the same time, the premier announced that a tax would be imposed on all grades of fuel oil, but this does not affect the lubricating oil used by motor cars.

Long urged by the Alberta Motor Association, Premier Aberhart announced that the motor license year would be changed to conform with the fiscal year ending March 31. Legislation for these changes will be introduced at the coming session of the legislature, the premier said.

## Italian Deserters

Report That Nearly 2,000 Soldiers Cross Austrian Border

Vienna.—Reports that nearly 2,000 deserters from the Italian army had fled across the border into Austria circulated here, but there was no immediate verification of the rumors, nor of reports that the Italian government was taking repressive measures.

The newspaper Suedtiroel Heimat announced 1,600 South Tyroleans had deserted the Italian army, with most of them making their way to Germany.

The publication is circulated secretly in Austria, reaching here from Switzerland where it is printed.

Reports from Maribor place the number of deserters reaching Yugoslavia at 2,000.

## LINK WITH THE PAST IN DANGER

Gangs of men will be working day and night for the next three or four months to save the half-timbered frontage of Staple Inn, Holborn, London's best known relic of Tudor architecture, which has been seriously ravaged by the death grey beetle. Our picture shows scaffolding going around the front of the old inn.

## U. S. PRESIDENT REFERS TO BASIC CAMPAIGN ISSUE

Washington.—President Roosevelt, clearly aiming across party lines, formally opened the Democratic presidential campaign with an assertion that "the basic issue will be the retention of popular government" in the United States elections in November.

Referring briefly to the clashing philosophy in the supreme court's opinions on the overthrow of the agricultural adjustment administration as likely to reverberate for years, and touching on the aims of his administration in general, the president concluded:

"We will not retreat." He spoke directly to a Jackson Day gathering of nearly 2,000 Democratic leaders and adherents, who paid \$50 a plate for the dinner, and his words were broadcast to hundreds of other Democratic dinners throughout the country. He urged all to get "at the truth" behind "the smoke of charges and counter-charges of a national campaign."

Twice the president emphasized his desire to speak to citizens regardless of "political affiliations," and once urged as "essential" an "organization among all those, regardless of party, who believe in retaining progress and ideals."

Referring to the supreme court's A.A.A. decision, the president declined to say what would be done. He promised, however, that "justice" for agriculture would remain an objective.

Mr. Roosevelt stressed the "two momentous opinions" of the court, apparently referring to the majority and minority opinions on A.A.A. and the philosophy of the three justices who voted to uphold, as against the six who declared the farm plan invalid.

In so doing, he renewed the emphasis placed by others in the administration since the court's decision on the fact that the minority opinion both hit at the majority's theory of government and contended that it had exceeded its power.

Here is the president's complete reference to the A.A.A.:

"I know you will not be surprised by lack of comment on my part on the decision by the supreme court. I cannot render off-hand judgment without studying, with the utmost care, two of the most momentous opinions ever rendered in a case before the supreme court of the United States."

The ultimate results of the language of these opinions will profoundly affect the lives of Americans for years to come. It is enough to say that the attainment of justice and prosperity for American agriculture remains an immediate and constant objective of my administration.

Mr. Roosevelt from time to time hit at "musty reaction" and "outworn traditionalism." He asserted "no party of reaction" could "meet the temper of the people."

## First Eclipse This Year

Was Visible At Its Start In Northwestern Canada

New York.—A total eclipse of the moon on January 9 was visible in northwestern Canada but not in any part of the continental United States except Alaska.

The eclipse at its beginning was visible generally in the northeastern part of the Atlantic Ocean, Europe, Eastern Africa, Madagascar, Asia, the Indian Ocean, Australia, Polynesia, the western part of the Pacific Ocean, Alaska, northwestern Canada, and the Arctic Ocean.

At its end the eclipse was visible in the eastern part of the Atlantic Ocean, Europe, Asia, Africa, the Indian Ocean, Australia, with exception of the southeastern part, the western part of the Pacific, northwestern Alaska, and the Arctic Ocean.

## Outfitting Grist Liner

Glasgow.—Jesse, cotton and woolen articles for the giant liner Queen Mary to the value of \$225,000 are being made in the north of England and Belfast, the number being nearly 600,000.

## OLD-STYLE JOURNALISM.

Editing a newspaper in these days is not a very exciting adventure, and the mortality rate of editors is not discouragingly high. Things were not always so, says a writer in the Wallingford (Oregon) Outlook. Especially in the smaller towns shooting affrays in which the rival political factions and dare-devil editors took part furnished part of the regular weekly news. Nowadays an editor grabs a note book and pencil when answering calls. In the old days he grabbed a six-shooter.

However, a town near here seems to be experiencing some of the old style of journalism. The publisher of a County paper was shot down recently under mysterious circumstances, and a considerable scandal was developed over the affair.

Seattle had, at one time, an editor who belonged to the old school that believed in picturesque and lurid language with not too much attention to the amenities of life when it came to writing of competitors. Many citizens will remember those sizzling editorials of Alden J. Blethen, almost every other word set in blackface type to simulate explosive vehemence. His simple but expressive name for The Seattle Star is hard to forget, but we would hate to mention it in these columns. Anyway, The Star survived the reproach.

## THE UNFORESEEABLE VAGARIES OF LOCOMOTION.

Montreal Gazette: Nobody who is driving a car knows what a cow is going to do: nor does the cow. The motorist finds himself on the horns of a dilemma. He wishes to pass the cow, but has no means of knowing where the cow will be when he arrives. He has little stomach for it, whereas the cow has four.

The driver has no preconceived antipathy for the cow; indeed, the milk of kindness may be in him. His ordinary sentiment in the matter of cows is one of goodwill and esteem. He has no desire to injure either hair or hide of the ruminant ruminating in the highway; but the cow, preoccupied with her feeding problems, has a tendency to gyrate. The cow, in moments of abstraction common to all deliberative animals, college professors, etc., is subject to unpremeditated and therefore unforeseeable vagaries of locomotion.

These are very embarrassing to the automobile driver, whose only safe course is to go back a few miles and detour. It is difficult, in the light of personal experience, to completely stifle all sense of sympathy for the Truro (N. S. offender, who hit a cow and was mulcted. He is left to chew upon the cud of his melancholy reflections.

But there is a point of great importance involved. A way out has been found for the ordinary human biped, who has no right of way. All that he has to do now is to look like a cow.

## THE PREACHER'S GOOD LUCK.

Commenting on the story of a man who went hunting and after poor luck returned home to find a deer in his own garden, a down east daily remarks "There is also the true story of a clergyman who went hunting in season and returned home without the expected birds for dinner, only to find that a partridge had flown into the house in his absence and that wife had it all fried and ready for the hungry man."

## STONY PLAIN SUN.

Published Every Thursday at The Sun Office, Stony Plain.

## "THE GRAIN FORUM" RADIO PROGRAMMES

"The Grain Forum" radio program, which commenced over a network of Western stations on Friday, Dec. 6, is a half-hour feature sponsored by the Northwest Grain Dealers' association and the Winnipeg Grain Exchange. It commences at 8 p. m. Mountain standard time.

As its name implies, "The Grain Forum" is intended for the public discussion of matters of special interest to grain producers. There in the series to date, brief talks have been given and questions invited on the following subjects: "The World's Foodstuffs and the Placoe Occupied by Wheat" and "The Winnipeg Grain Exchange, What It Does." On Friday, Jan. 10, the subject was "What the Winnipeg Grain Exchange Does Not Do." On Friday, Jan. 17, the talk will be on "The Factors That Govern and Influence the Price of Wheat." Later in the series, "Canada and Her Competitors" will be the subject.

There is, of course, the danger of a radio program developing into a one-way affair, but the idea of this particular Grain Forum is that producers and all others interested should be represented in the discussions. Questions relating to all grain problems are invited from listeners-in, and it is the intention to deal with these questions, so far as possible, over the air. All enquiries, in any event, are answered by mail.

But this does not cover all the radio action of the "Grain Forum" for pleasing and popular music is an essential part of the program.

One other feature should not be overlooked. A special competition is now under way for bona fide growers of grain or members of their families, who are asked to submit ten-minute manuscript speeches on either of the following subjects: "Some Major Problems in Grain Growing" or "Some Major Problems in Grain Marketing". Valuable cash prizes are to be awarded, fifteen in number, for the winning entries, and it is to be noted that free expression of opinion is welcomed and will not affect the opportunity of winning a prize. One of the winning contestants will be invited to Winnipeg as the guest of the sponsors of the "Grain Forum".

"The Grain Forum" welcomes constructive criticism and anyone who listens on Friday evening from 9:00 to 9:30 p. m. Central Standard Time (8:00 to 8:30 p. m. Mountain Standard Time) can thereafter consider himself or herself enrolled as a "candid critic" for the "Grain Forum" is anxious to receive comment from its already remarkably extensive and steadily growing radio audience.

## FLEMING'S FOLLY

— BY —  
LAWRENCE A. KEATING

CHAPTER IV—Continued

There was a short silence. "Don't know why you think I want your scalp, Link," he complained. "Course there may be guys that do. I wouldn't go so far as to name 'em, but you know as well as I do, you ain't too popular with friends of Buzz Hamilton. Some of the guys are sore because you tried to trick 'em into that fool irrigation scheme that would cost sixty thousand bucks and wouldn't be worth a nickel. Maybe some'll blame you for gettin' Buzz so mad he tried that shootin' in the hotel. Can't explain how folks are apt to look at a thing," he reminded ironically.

Fleming waited. Roper moved nearer. "I need more range for my cows, Link, and your grass looks pretty good to me. 'Specialty' I need more if we have trouble about this football order from the government." And I reckon Uncle Sam means business. Uh—your horse might suffer from a hard winter, if we'd have one. Guys have found out before this they couldn't stand the climate here in Boone County. So I just thought I'd drop in to talk it over with yuh."

"Buyin' you out. Want to sell, Link?" His grip had an evil, mocking glint to it.

"Willing to let anything I have for the right price," was the prompt answer.

Roper rubbed his hands. "Shucks! I don't half believe that guy that shot at yuh really meant to kill yuh at all. Just sort of tossed a scare, I reckon. But yuh're smart to heed that warnin', Link. I'll give yuh three thousand dollars cash for yore land, cattle, and everything on the Star Poot, but yore personal stuff."

Fleming rubbed his chin thoughtfully. He rose and sauntered toward the door. Opening it with care lest another ambush's shot come whizzing through, he looked back at Kilgo.

"It would take just six times three thousand to start me considering. Now Roper, you can git!"

His face suffused with fire, his small, piglike eyes were frosty with longing for the opportunity to draw and send a bullet in his host's body. Remembrance of the "interference" with Helen Hamilton rankled fiercely, as did also thought of more than one previous clash between them.

"Fleming," he warned savagely, "yuh can't take that money to hell with yuh. And that's where yuh may land if yuh don't pick Texas instead. 'Em boss of this county, and I ain't lettin' you take my girl away from me. I want your land and I'll git it—or I'll break yuh. Savvy?"

"I'm offerin' three thousand dollars. How about it?"

A dry, tantalizing smile creased from the corners of Link's nose to his mouth. Roper stood sideways to him, his booted feet rose with speed and power that gave no chance of escape.

of a glass of water; gargle twice. Do not rinse mouth.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company. Look for the name Bayer in the form of a cross on every tablet.

There was a thud, a grunt, and Kilgo lurched forward and out onto the stoop. Curves burst from his fat lips, acid and searing.

Link slammed the door and leaped back. He was in the nick of time. A shot roared outside, and the nose of a head shot, hurled into view through the oak panels. Had Fleming not sprung away he would certainly have received the bullet full in the stomach, in a wound similar to that which had laid poor Buster Townsend at death's door.

Swiftly he blew out the lamp and for several moments waited in darkness. When hoofbeats sounded faintly outside he produced a match and struck it. The flame was cupped in his palms when someone pounded impatiently on the door.

"Hay, Link, open up!"

He lighted the lamp, then complied. It was Wavo Byrne with another wildside cide behind, their faces relaxing as they saw him.

"Hagad, shootin' again and thought yuh were a gonner. What was it?"

"Just a little disagreement. Kind of a warning. I'm not hurt, but it may be Roper'll have to stand in his stumps half-way 't' town. Did I find that riflemen?"

"Now—disgracefully. 'We'll go after him again.'"

"Afraid it's no use, boys; save yourselves the trouble. Good night!"

They left the room and could be heard growling as they went toward the bunkhouse. "An ironic, musing smile hovered on Fleming's lips as he strolled into the kitchen and set about preparing his belated evening meal."

"Kilgo never did have much sense of humor," he muttered, measuring coffee into the pot. "I'll bet he takes this real serious, and makes trouble. Or tries to, anyhow."

"But, Roper, he has no influence over me. I—"

"Been writin' yuh letters, ain't he? Got yuh sold on the proposition even before yuh got home. He knew I wouldn't let yuh join up on a loco scheme like that, nor Buzz. We're lookin' after yore welfare."

"To show I got yuh interest at heart," he went on impressively, "I tried to buy Link's ranch the very night you came home. So yuh wouldn't have him hangin' around, botherin' yuh. Offered him a high price, cash. He turned it down. Can you beat that?"

"How much did you offer him? Perhaps it wasn't what the place is worth."

"That collection o' buzzard meat he calls cows?" He laughed mirthlessly. "And a bunch of scandalous feed o' it offered him twenty thousand cash. And would he take—"

Emerging through the doorway, his startled eyes found Link. "You offered me twenty thousand cash, eh, Roper?"

"Why—uh. Quickly he changed his tone to a bluster. "Yuh know darn well I did."

"That's funny. I understood you

"That collection o' buzzard meat he calls cows?" He laughed mirthlessly. "And a bunch of scandalous feed o' it offered him twenty thousand cash. And would he take—"

"Why—uh. Quickly he changed his tone to a bluster. "Yuh know darn well I did."

"That's funny. I understood you

fixed stern grey eyes on the prisoner. "The jury has found you guilty of attempting to murder Lincoln Fleming. Have you anything to say?"

"Hamilton merely stared down at his hands.

"According to the law it is now my duty to impose sentence. It is the order of this court that you be remanded to the charge of the warden of the State Penitentiary, there to be held prisoner for three years, sentence to begin at once!"

"And when you get free, young fellow," the Judge added with severity, "I warn you to remember this county isn't wide open. The sheriff's duty is to maintain order. That means no careless handling of deadly weapons. Take the prisoner away!"

A rush of whispering went around the room. "Three years!" Stephen snapped disgustedly. "Say, he should've got ten!"

"Court adjourned!"

Spectators rose and began to file out. As Hilda jerked Buzz to his feet Helen stepped and him and threw her arms around him. There was a brief, touching exchange of whispered farewells; and the sheriff quickly pushed her away. A moment later Amos accompanied Buzz out of the room. He would be started for the penitentiary at once, to be gone three years.

Fleming concluded to wait outside, and took himself down the rear stairway. Pausing to build a cigarette, he heard other descent in his wake. Roper Kilgo's booming tones carried to his ears as the man sought to comfort Helen.

"Should have hid in the foothills till this was over, that's what he should have done. If Link was any kind of a friend, he would have, too. I would, yuh bet!"

"But, Roper—"

"If Link wasn't on hand to speak his piece, Buzz might've got off. Townsend ain't gonner, die—he's too tough. Why didn't I jump just stay away from the trial?"

They paused just inside while the girl donned her coat. "Helen, it looks to be like, he framed this whole thing. Soak Torrey may be hard on Roper, but he ain't a fool. He was primed why did he let you get in front of all them men, he decided to tell the truth. He ain't showed up since. Why? Must be he's afraid something'll happen to him!"

"With that scheme, spoiled, and yore right if the logical spread to help him pay for the plan, Link figured right off he needed to get yuh in charge. Buzz was wise to him, of course. So Link gets Buzz rose enough to draw. Townsend was walkin' handy to jump on him. Up shot it was rumormongers. The trial now, and Fleming will try to talk yuh into puttin' money to get yuh wants to build."

"But, Roper, he has no influence over me. I—"

"Been writin' yuh letters, ain't he? Got yuh sold on the proposition even before yuh got home. He knew I wouldn't let yuh join up on a loco scheme like that, nor Buzz. We're lookin' after yore welfare."

"To show I got yuh interest at heart," he went on impressively, "I tried to buy Link's ranch the very night you came home. So yuh wouldn't have him hangin' around, botherin' yuh. Offered him a high price, cash. He turned it down. Can you beat that?"

That's why so many of Canada's noted cooling authorities always use and recommend it! And this fine-quality baking powder costs so little to use—actually less than 1¢ per loaf! Order Magic from your grocer—today!

## Little Helps For This Week

Be not hasty in thy spirit to be angry, for anger resteth in the bosom of fools. Ecclesiastes 7:6.

Quench both the fires of hate and strife.

The wasting fever of the heart: From perils guard thy feeble life, And to our souls Thy peace impart.

When you are offended or annoyed by others do not suffer your thoughts to dwell thereon, or on anything relating to them, for all this is fuel and kindling of wrath, anger and hatred. Struggle diligently against your impatience, and strive to be gentle and amiable, in season and out of season, toward everyone however much they may vex and annoy you, and be sure God will bless your efforts.

## The Union Jack

British Flag Is To Lose Its Ancient Redness

A sensation burst upon Britain, with the discovery the Imperial red of the Union Jack is to lose its ancient redness.

The change is a result of a government order substituting other dyes for those previously used to color the red hank, in an attempt to save money.

The British color council refused to accept the resulting tint as red, saying it was a mere dirty brown or rusty color. The council insisted the traditional red, white and blue, pride of Britain for centuries, would become rust, white and blue.

Substitution of a synthetic dye for the brilliant, but costly cochineal hitherto used was decided upon by an inter-governmental technical co-ordinating committee, originally set up at the instance of the war department.

## Moscow's Hotel De Luxe

The Moscow Soviet hotel—a private bath in each of its 1,200 rooms—has opened its doors to a curious and appreciative public.

The new hotel extends over a full square in the downtown section. Walls of many of the rooms of the hotel are of pure marble.

### Weak with the Grippe.

Miss Anna Hepko, 10845 98th St. Edmonton, writes:—  
"I was so weak with the Grippe that it made me quite helpless. A friend told me to try Dr. Martin's Tonic Remedy. And it certainly got me on my feet, and built up my strength. That I wish to let everyone know of this Remedy. How quickly it acts and how reliable it is. Children will take it readily, no mixing or using. It contains no Laxatives or Narcotics. A quick acting tonic that builds up your vitality. Dr. Emil Martin's valuable remedy for Coughs, Colds and La Grippe. Large bottle, price, 75c., at Hayes Drug Store Stony Plain.

### Stony Plain and District.

On Thursday last a team of lady curlers went in from Stony and played a City team at the Thistle rink. The visitors made a first-class showing. The team consisted of Mrs. R. A. Walton, Mrs. Geo. Oppertshausser, Mrs. Henry Oppertshausser, Mrs. Larson.

The skating party held the other evening by the Stony Plain branch of the Walther League was a very successful affair, being well patronised.

The Tux Boys intend holding a skating party at the local rink tonight, Thursday, Jan. 16.

At the annual meeting on Saturday of Glory Hills S.D. caterers, Mr. M. Schellensberger was re-elected a trustee. The other members of the Board are A. Jespersen (chairman) and Fred Spady. Herb Wolfe, secretary.

Attention is drawn to the special 9 cent sale that starts at Hardwick's Departmental Store tomorrow, Friday, Jan. 17. At the notion counter will be found something to interest every housewife.

The Intermediate C.G.T. are holding a Potato Social in the United Church on the evening of Friday, Jan. 31.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

**BUTTER AND EGGS WANTED**  
at The Royal Cafe.

### Premier Aberhart Invited.

Premier Aberhart has been invited to address the United Farmers of Alberta at the organisation's annual convention in Edmonton on Tuesday next, Jan. 21. The intention is that he convey to the convention greetings on behalf of the Government. Lt.-Governor Walsh will deliver the welcoming address and Mayor Clark will speak.

### News Condensed.

Editor—How's the new society reporter? I told him to condense as much as possible.

Assistant—He did. Here's the account of the afternoon tea: "Mrs. Lovely poured, Mrs. V. Jaber roared, Mrs. Duller tored, Mrs. Rasping gored, and Mrs. Empoospoint snored."

### Farmer Was Right.

Farmer Hayrick—Mighty wet rain, hain't it, squire?  
Squire Crouch—Ever hear of rain that wasn't wet, you idiot?

Farmer Hayrick—Yes, I did. Accordin' to Scripture, it once rained fire and brimstone.

### H. W. Dodge Resigns.

Mr. H. W. Dodge, well known in Stony Plain, having been the Official Secretary for Inga Municipality in 1932, with offices in Stony Plain, last week resigned from his position as Inspector in the Dept. of Municipal Affairs. Mr. Dodge had, for the past 18 months, been operating for the municipal districts in Athabasca district.

Mr. Dodge was an officer for the department for many years. His territory in the Athabasca district was huge, and he made his trips in mud, snow or good weather. The Edmonton Journal quotes Mr. Dodge as saying, when he announced his resignation, "I felt that the axe would fall on one who could not learn the Social Credit Catechism or define the just price. I have forestalled the dictator."

### By the Onion Skins.

Let the mercury scamper as far down the thermometer as it can go, Mrs. Lena Franz, a lady living on Long Island, believes in her onions. "Their thin skins have promised a mild winter, and a mild one it will be, she says."

For more than a generation this gray haired lady has foretold the severity of the winter by the thickness of red onion skins. She made her examination 3 times during the fall because of the contrary verdicts of other amateur weather prophets.

### Within His Rights.

Premier Aberhart is quite within his rights in proposing to start a daily newspaper. It is the privilege of anyone to do so any place and any time. In it he can advocate any theory within the law. But it is safe to say that if he does so he will quickly become a wiser and a sadder man. Almost all publishers are sad; a few are almost wise.—Saskatoon Star-Phoenix.

### 'Realistic.

The Author—"Well, how did you like my new play; didn't you think the church scene realistic?"

The Critic—"Why, intensely so. A great many of us actually went to sleep while it was on."

### The Market Report

| WHEAT.               |      |
|----------------------|------|
| No. 1 Northern ..... | 0 69 |
| No. 2 Northern ..... | 0 67 |
| No. 3 Northern ..... | 0 62 |
| No. 4 Northern ..... | 0 60 |
| BARLEY.              |      |
| 2 C. W. ....         | 21   |
| 3 C. W. ....         | 17   |
| Extra 1 Feed .....   | 16   |
| No. 1 Feed .....     | 15   |

| HAY.                 |      |
| No. 3 .....          | 20   |
| No. 4 .....          | 17   |

### In Memoriam.

In loving memory of Rudolph Goebel, who was called away Jan. 19, 1933, and Mrs. Mary Schenack; Nov. 14, 1932.  
When I sit and think of you when we are all alone,  
Forememory is the only thing that grief can palliate on.  
Like ivy on the withered oak, when all other things decay,  
Our love for them will still keep green and never fade away.  
—Ever remembered by his Wife.

### Too Much to Hope.

Premier Aberhart is authority for the statement that there will be no newspapers in heaven. Is it too much to hope that there will be no broadsheeting strations?—Edson Signal.

### The Way of It.

Sam—I believe our climate is changing.  
Tom—Think so?  
Sam—Our winters seem to be getting warmer.  
Tom—Well, the women wouldn't wear enough clothes. The climate had to change—the women would not.

### The Start.

When the clock struck the midnight hour, father came to the head of the stairs and in a rather loud voice asked "Young man, is your self-starter out of order to night?"

"It doesn't matter," replied the young man. "so long as there's a crank in the house."
